

PROJECT SERVICES AND STAFFING SOLUTIONS

Whatever it is that you need, we will get your projects on track immediately with practical solutions. After all, everything to do with permanent placement and staff leasing, payroll, HR, software and hardware implementation, project management, contract management and staff training is exactly our thing.

The following projects are examples of our wide range of services:

MULTILINGUAL TRAINING MANAGEMENT FOR CLOUD TELEFONY

Design, planning and delivery of online training for 6000 employees of an insurance group during the implementation of a new cloud telephony solution. We were able to deliver over 100 hours of training in four languages, meeting all schedules and ensuring that each learning team is in the right virtual room at the right time.

BIG 4 HARDWARE & SOFTWARE REFRESH PROJECT

Our teams took care of everything from rollout planning and execution to resource planning and physical hardware replacement. iET also coordinated delivery, transport, deployment, support, decommissioning, wiping, and recycling. Our Big 4 client chose us for this essential work because they know that with iET the entire project runs both smoothly and confidentially.
